**safety**  
THINK VIKING™

# Helicopter Transport Suits and Lifejackets

**VIKING is the first to release a complete ETSO approved transportation suit and lifejacket system for pilots and crew - designed for operations to and from helidecks**

All passengers and crew travelling by helicopter in hostile sea areas as defined in JAR-OPS-3 must wear ETSO approved immersion suits and lifejackets.

Following recent EASA (European Aviation Safety Authorities) approval, VIKING has become one of only a few suppliers in the world able to offer a fully ETSO approved system comprising a transportation suit and lifejacket. We offer rental or leasing agreements on ETSO equipment at selected locations. Please contact your nearest VIKING office for more information.

## ETSO immersion suits

The new requirements for immersion suits focus on four primary safety features:

- Reduce amount of trapped air when submerged for better freedom of movement during evacuation
- Reduce amount of leakage for better protection against hypothermia
- Improve thermal protection that corresponds to a Class B suit
- Improve visibility for search and rescue operations

***Passengers and crew travelling by helicopter to hostile areas must wear ETSO approved immersion suits and lifejackets.***

***VIKING offers fully ETSO approved systems that are ready for use with a standard harness.***

## ETSO lifejackets

Lifejackets also include important safety improvements:

- Equipped with a sprayhood which can be deployed within 20 seconds
- Mouth freeboard at least 120 mm
- Fitted with a flashing light at a rate of 50-70 flashes per minute for better visibility
- Optional VIKING EBS, an emergency breathing system with a re-breather that supplies air for a minimum of 60 seconds

## Suits

- PS4003 VIKING Helicopter Transportation Suit, ETSO approved
- PS4103 VIKING Helicopter Transportation Suit for training

## Lifejackets

- PV9355 VIKING Helicopter Lifejacket ETSO approved
- PV9365 VIKING Helicopter Lifejacket ETSO approved
- PV9302 VIKING Helicopter Lifejacket with EBS, ETSO approved

## Accessories

- PLB/HT

## VIKING Helicopter Transportation Suit

- Top of the line model with optional intelligent thermal liner that regulates body heat
- Outer fabric NOMEX® with a GORE-TEX® moisture barrier for better breathability
- Integrated valves to remove trapped air in an evacuation situation to control buoyancy
- Detachable gloves
- J-zipper for added comfort
- Superior comfort with several adjustment features
- Sizes: XS-SPL

ITEM NO.: PS4003

ETSO approved

## VIKING Helicopter Lifejacket

- Top of the line easy to use lifejacket for use during transportation
- Detachable escape Emergency Breathing System on front cover with automatic and manual release system.
- Sprayhood
- Detachable neck protection
- Emergency light, whistle, buddy line and lifting becket
- Manually or orally inflated

ITEM NO.: PV9302-6

ETSO approved

## VIKING Helicopter Transportation Suit for Training

- Training version of PS4003
- Outer fabric GORE-TEX® Pazifik™
- Integrated valves to remove trapped air in an evacuation situation to control buoyancy
- J-zipper for added comfort
- Sizes: XS-SPL

ITEM NO.: PS4103

## VIKING Helicopter Lifejacket for Training

- Training version of PV9302-6
- Detachable escape Emergency Breathing System on front cover with automatic and manual release system.
- Sprayhood
- Detachable neck protection
- Emergency light, whistle, buddy line and lifting becket
- Manually or orally inflated

ITEM NO.: PV9302

## VIKING Pilot Suit

- Pilot suit with U-zipper for better comfort during constant wear
- Outer fabric NOMEX® with a GORE-TEX® moisture barrier for better breathability
- Shaped knees and elbow reinforcements
- Multiple pockets
- Elastic intake at waist and center back
- High flex neoprene collar
- Inside braces attached to upper part of the suit, for convenience when the suit is not fully donned

ITEM NO.: PS4043

ETSO approved

## VIKING Pilot Suit

- Pilot suit with split neck zipper for better comfort during constant wear
- Outer fabric NOMEX® with a GORE-TEX® moisture barrier for better breathability
- Shaped knees and elbow reinforcements
- Multiple pockets
- Elastic intake at waist and center back
- High flex neoprene collar
- Inside braces attached to upper part of the suit, for convenience when the suit is not fully donned

ITEM NO.: PS4044

ETSO approved

## VIKING Pilot Suit

- Pilot suit with J-zipper for better comfort during constant wear
- Outer fabric NOMEX® with a GORE-TEX® moisture barrier for better breathability
- Shaped knees and elbow reinforcements
- Multiple pockets
- Elastic intake at waist and center back
- High flex neoprene collar
- Inside braces attached to upper part of the suit, for convenience when the suit is not fully donned

ITEM NO.: PS4045

ETSO approved

## Personal Locator Beacon AU9-HT for Helicopter Transit

- 5 second auto-activation upon continuous immersion
- 40 second fail safe auto-override
- Manual activation
- LED strobe on antenna
- Automatic low battery warning indicator
- 100 m<sup>W</sup> power output

ITEM NO.: R6200302

## VIKING Helicopter Transportation Suit

DUAL  
APPROVED

- Top of the line model with optional intelligent thermal liner that regulates body heat
- Integrated valves to remove trapped air in an evacuation situation to control buoyancy
- Detachable gloves
- J-zipper for added comfort
- Superior comfort with several adjustment features
- Sizes: XS-SPL

ITEM NO.: PS4003-10

ETSO and SOLAS approved

## Personal Locator Beacon AU9-WF for Wind Farms

- 2 second auto-activation upon continuous immersion
- 40 second fail safe auto-override
- Manual activation
- LED strobe on antenna
- Automatic low battery warning indicator
- 500m<sup>W</sup> power output

ITEM NO.: R6200304

## VIKING Helicopter Lifejacket

- Military inspired combat style designed for helicopter pilots
- Snug fit for comfortable extended wear
- Spray hood, emergency light, whistle, buddy line and lifting becket
- Detachable PLB pocket
- Adjustment girths

ITEM NO.: PV9365

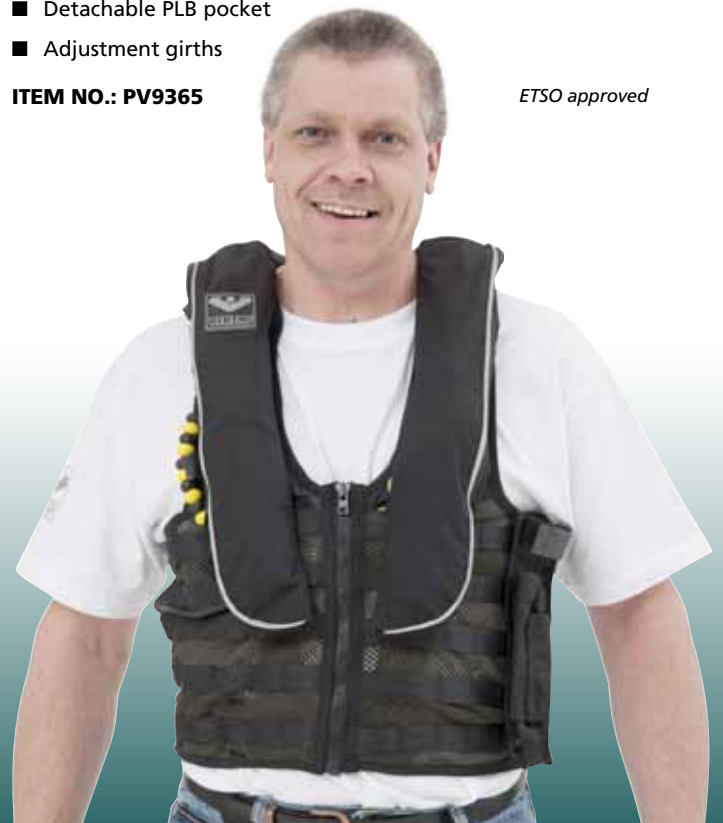

ETSO approved

## VIKING Helicopter Lifejacket

- For use during transportation
- Comfortable and lightweight
- Multiple adjustment possibilities
- Extra padding on back for added comfort and support
- Sprayhood
- Manually or orally inflated

ITEM NO.: PV9355

ETSO approved

# PPE Servicing

## Efficient service for smooth operations

### Flexible options that save time and money

You can choose between attractive day-to-day rates or customizable fixed price agreements.

VIKING's fixed price exchange agreements are an excellent option for rigs and supply ships. When suits and lifejackets are due for service, they can be exchanged on the platform or at pier with suits and lifejackets from a stock pool. No need to wait for servicing that can cause costly delays.

Consolidating the servicing of safety equipment can make it easier to keep track of the servicing status and due dates. Including immersion suits for servicing with other safety equipment minimizes costs related to handling, transportation and overtime.

*The drying cabinet is the most efficient way to prepare suits for delivery*

### Certified servicing makes a difference

VIKING has been a manufacturer of quality protective clothing for over 25 years. VIKING trained and certified servicing stations follow strict guidelines for servicing suits and lifejackets.

### ETSO Requirements

ETSO certified immersion suits and lifejackets require specially certified service facilities. Each immersion suit and lifejacket type have individual servicing requirements, however all require tracking of every detail and spare parts used. VIKING is fully certified to service and issue certificates for ETSO suits and lifejackets at several locations to ensure airworthiness, reliability and security.

# One safety solution. One global partner.

## A safety solution tailored to your operation

A VIKING Offshore Service Agreement is a uniquely customizable concept that incorporates safety products, single-source management and global financing in a variety of fixed price structures.

The concept is designed to help you focus on your business. You can choose among its many options to

free your mind from worries about service due dates, multiple vendor planning, fluctuating servicing costs and other administrative tasks.

And get added peace of mind with a single point of contact for your servicing needs across the globe.
